

# BACHMAN'S

To Whom It May Concern,

I'm writing this letter in recommendation of the services provided by PE Systems. When I was initially contacted by their sales executive, I saw the overall value in what they were proposing, but to be honest, it just sounded a little too good to be true. I was concerned that the service may not be as hassle free as they were depicting to us, but in the end, it just made too much fiscal sense to not give it a chance.

I am very happy to say that the process has truly been as simple as they promised. By sending our initial statements electronically, it required minimal effort on our part to get PES the information that they needed to do their work. We also know that by having a dedicated account manager, we have the benefit of her managing our fees and fixing the problems that cost us money as they happen. The team at PE Systems has handled our account in an extremely professional and confidential manner and as a result has done nothing but positively affect our existing operations.

I strongly recommend that if given the opportunity, you partner with PE Systems to reduce your credit card processing fees.

Regards,
