To Whom It May Concern:

I'd like to take a minute to describe our experience with PE Systems and the unique service that they provide. When we were approached by PE Systems we felt that we had a good understanding of our credit card charges and the fees that our college was paying to accept credit cards. Since the cost was based solely on savings, we decided to give PE Systems a try.

This endeavor has proven to be very beneficial. We did not realize how intricate the credit card industry was or the complexity of the charges. The experts at PE Systems have a wealth of knowledge regarding the credit card industry and of the many factors that determine how much an organization pays in fees. The education that PE Systems has provided us has been very valuable as well as the cost savings.

I would recommend the services of PE Systems to anyone that would like to save money on the fees that they are paying to accept credit cards.

Sincerely;

Director of Financial Services
