To Whom It May Concern:

I am pleased to write this letter to share my experiences with the team at PE Systems. We are a large retailer with 151 stores in the Midwest and we are always looking for opportunities to reduce our costs and grow our business. The item of an independent expert to review our credit card processing statements was very interesting to us. We had just recently changed our processor and wanted to be sure the move had been a beneficial one and that we were receiving the fee structure we had anticipated. So, we engaged PE Systems to review our statements.

The results with PE Systems have been very good. We did achieve savings that we had not anticipated. Our Account Manager at PE Systems has been very diligent in looking for those savings opportunities and has the skills to provide us with the necessary information to make the changes. She has always kept the interests of our company first and foremost and she has been a pleasure to work with.

We would highly recommend the services provided by PE Systems.
