

To Whom It May Concern:

This letter is in regards to our experience with PE Systems Corporation. We contracted with PE Systems to look into the fees that we were paying to accept credit cards. When we checked their references we received positive feedback from those who had engaged them in the past. Since there was no cost to the university if they didn't find a way to save money, we believed the review by an outside organization with experience in the credit card industry would be worthwhile and hopefully result in lower fees.

We were quite interested and honestly surprised by the information that they returned to us. PE Systems did find savings for us after a thorough review of our processing arrangements and through negotiations with our card processing bank. They also made recommendations on ways to reduce our processing costs by utilizing new technology and taking advantage of processing steps that were being overlooked. PE Systems has worked efficiently and promptly to get these issues addressed for our organization.

I have been very pleased by the service offered and the job done by PE Systems and I have no reservations in recommending their service to others.

Sincerely,

Director of Business Services & Controller
