

TREVECCA

NAZARENE UNIVERSITY

To Whom It May Concern,

We began our relationship with PE Systems nearly three years ago, not really sure how much benefit they would provide but willing to have them see what they could do for us since our only risk was the little bit of time it took to provide them with copies of our prior statements. It was our experience that merchant card fees and discounts were nearly impossible to understand and even more difficult to evaluate whether or not we were being charged correctly.

PE Systems has performed wonderfully for us and saved us thousands of dollars in fees – money that goes directly to the bottom line. They have been able to uncover and recover savings and refunds and I appreciate the work that our account manager does for us on a monthly basis. Because of the detail oriented manner of their service, they continue to find and fix any problems that enter our environment as soon as they happen, which continues to save us time and money. Their staff have been easy to deal with and required virtually none of my time since the original setup.

Our experience has been very positive and they have earned our confidence and respect, so much so that we renewed our contract at the end of the original term.

I recommend PE Systems to you without reservation. If you accept credit cards, do yourself a favor and let them analyze your activity.

Sincerely,

Director of Financial Services
